

CTX Care Pods

DESCRIPTION:

Solid compound in POD (water soluble film) for swimming pool water maintenance specially formulated so that, with a single application in the water, it will:

- Keep the water bright and transparent.
- Remove phosphates from the water.
- Prevent and eliminate foam generation.
- Remove the remains of body oils and/or creams.

You can forget complicated dosing systems and the use of multiple products. With CarePods it has never been easier to enjoy a transparent, algae-free swimming pool.

This is a highly concentrated product with the following benefits:

Environmentally friendly

- Highly concentrated, biodegradable product.
- Less use of raw materials, packaging and energy in its production.
- 75% saving on CO₂ emissions in transporting it.

Application control and minimum waste management costs

- Exact control of product used (dose = POD).
- Reduction in waste management cost (Ecoembes).

Minimum occupational risks

- Safe handling and no contact with the chemical product.
- Easier, cleaner and more convenient.

Saving on storage and transport space

- Reduction in product volume thanks to its high concentration.

PROPERTIES:

Appearance	Powder in water-soluble film
Colour	White
pH (1% solution at 20°C).	4.2 +/- 1
Weight (pod)	28 g (4 un./bag) / 40 g (2 un./bag)

CHARACTERISTICS:

- Removes phosphates (food for algae).
- Removes the remains of body oils and/or creams.
- Clarifies the water thanks to its flocculation capacity. Product based on a natural component (chitosan).
- Non-foaming compound.
- Compatible with most disinfection treatments (including electrolysis systems).
- Can be used with any kind of filter.

DISPENSING AND USE:

Maintenance treatment: Add 1 CarePod of product for every 50 m³ of water every week.

This guideline dose may be modified depending on the characteristics of each swimming pool, weather conditions, etc.

How to use: Pour the product dose in the skimmer or directly into the swimming pool (the deepest part), switching the filtering system on. The product should preferably be added at dusk and without swimmers in the pool.

This product must be accompanied by normal swimming pool water disinfection treatment.

Note: The use of CarePods may make the swimming pool water cloudy in the initial phase. This is normal and indicates that the product is working. It will disappear in a few minutes. Use the pod when the water is at around 20°C.
